

IBADATT SINGH AULAKH

AI Engineer | DevOps Engineer | Software Engineer

Vancouver, BC, Canada | 672-966-9372 | isaulakh2004@gmail.com | linkedin.com/in/ibadatt-aulakh | github.com/ibadatt-2k | ibadatt-2k.github.io/portfolio

PROFESSIONAL SUMMARY

AI and DevOps engineer who ships production systems and keeps them running. Cut hallucinated answers to zero by building a RAG assistant grounded in a Qdrant-indexed document corpus. Eliminated a recurring software license by building a Python pipeline that processes 30,000–50,000 documents in ~20 minutes. Shipped a two-sided iOS marketplace from zero to the App Store as the sole engineer.

TECHNICAL SKILLS

AI & Machine Learning: Retrieval-Augmented Generation (RAG), Vector Embeddings, Qdrant Vector Database, Prompt Engineering, LLM API Integration, Large Language Models, Semantic Search, LibreChat, OCR, Intelligent Document Processing
DevOps & Infrastructure: Docker, Linux Server Administration, SSH, SSL/TLS Certificate Management, WebSockets, Git, GitHub, Release Management, Pull Request Review, Production Deployment, CI/CD
Languages: Python, TypeScript, JavaScript, Dart, PHP, SQL, Bash
Frameworks & Libraries: Flutter, Riverpod, Laravel, Node.js, pandas, pdfplumber, PyPDF2, Tesseract OCR, BeautifulSoup
Cloud, Backend & Data: Firebase (Auth, Firestore, Cloud Functions, Storage, FCM), Serverless Architecture, REST APIs, Stripe Connect, Webhook Integration, ETL Pipelines, Relational Database Design, Role-Based Access Control

EXPERIENCE

ObjectBright

AI & DevOps Engineer, Full-Time

Nov 2025 – Present

- Cut hallucinated, untraceable answers to near-zero by building and deploying a production RAG system that chunks and embeds the full company document corpus into a Qdrant vector database, constraining every response to indexed source material.
- Enabled swapping and benchmarking LLM backends without rewriting the application layer by integrating Gemma 3 and Codex behind a shared retrieval pipeline.
- Delivered real-time responses to end users by building a WebSocket interface and deploying LibreChat as the production chat front end for the company's self-hosted models.
- Maintained uninterrupted production service by owning release management (PR review and merge on the production branch) and administering the self-hosted Linux server over SSH, including proactive SSL/TLS certificate renewals.
- Kept containerized deployments stable by troubleshooting and resolving recurring Node.js dependency issues across Dockerized production services.

Software Engineer, Co-op

May 2024 – Aug 2024

- Eliminated a recurring third-party software license by building a Python extraction pipeline that parsed 30,000–50,000 unstructured insurance documents in ~20 minutes with near-zero numerical error.
- Turned scanned policy documents into analysis-ready datasets for SQL-backed commission and premium calculations by combining Tesseract OCR, pdfplumber, PyPDF2, BeautifulSoup, and custom regex parsers with pandas normalization.
- Delivered secure client-data storage across multiple company websites by building client-facing web features in PHP/Laravel backed by SQL data models.

PROJECTS

RepNation — Founder & Solo Engineer

Self-Funded iOS Startup

2026 – Present

- Shipped a two-sided iOS marketplace connecting personal trainers with remote clients as the sole engineer, from data modeling through code signing and App Store release, by building a 17-screen Flutter/Riverpod client on a TypeScript serverless backend (Firebase Auth, Firestore, Storage, Cloud Functions, FCM).
- Built a revenue engine that scales with coach billings instead of headcount by implementing Stripe Connect Express onboarding and recurring subscriptions on a 15% platform fee, with a signature-verified webhook listener syncing subscription state to Firestore.
- Eliminated a class of permission-denied failures by securing multi-tenant data with role-based Firestore rules and deterministic conversation IDs authorizing subcollection queries.

EDUCATION

Bachelor of Computer Information Systems, University of the Fraser Valley

Abbotsford, BC

Graduated December 2025 | Dean's List, Winter 2022
